

# Bhavna Kumari (she/her)

(240) 423-1065 | [bhavnagupta0103@gmail.com](mailto:bhavnagupta0103@gmail.com) | Hyattsville, MD | [in/bhavnakumari01](https://in.bhavnakumari01) | [github/bhavnakumari](https://github.com/bhavnakumari)

## PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building and operating AI-powered developer tooling, data-intensive backend services, cloud-native microservices, REST APIs, and distributed systems. Proficient in Java and Python with AWS, SQL/NoSQL, CI/CD, testing, observability, and production operations; delivered high-availability systems processing 1M+ transactions/day and measurable latency, reliability, and deployment improvements.

## EDUCATION

### Master of Engineering in Software Engineering

January 2025 - Dec 2026

### Minor in Cloud Engineering

GPA: 3.8 / 4.0

University of Maryland, College Park

**Coursework:** Software Engineering, System Design, Software Testing, Cloud Computing, Virtualization, Linux Systems

### Bachelors of Technology, Computer Science

August 2017 - May 2021

Adamas University, Kolkata

GPA: 3.86 / 4.0

**Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Computer Architecture, Cloud Security

## WORK EXPERIENCE

### Intuit

June 2026 - August 2026

#### Software Engineering Intern

San Diego, CA

- Built and deployed a production-ready AI-powered functional-test analyzer in 6 weeks using Java 21, Spring Boot, AWS S3, and CI/CD, moving failure detection from multi-day review to automated overnight triage.
- Triaged 18 failures in 3 days, cleared 89% of the backlog, and generated 8 merged auto-fix pull requests, resolving long-standing flaky tests and reducing manual debugging.
- Reduced AI prompt context from 1 MB to 12 KB (98.8%) through targeted log extraction; strengthened evaluation and guardrails with 114 unit tests, SHA-256 deduplication, automated crash recovery, and a 0.80 confidence gate for Git changes.

### British Telecom Group

November 2023 - January 2025

#### Software Engineer II

Bengaluru, India

- Designed and implemented scalable Java/Spring Boot microservices for high-volume distributed systems processing 1M+ transactions/day, reducing service load times by 40%.
- Improved deployment efficiency by 50% by optimizing CI/CD, automated testing, build processes, and cloud-native continuous-delivery procedures.
- Used application logs, monitoring metrics, and performance indicators to identify bottlenecks and improve system architecture and operational efficiency.
- Led root-cause analysis of production defects and performance issues, contributing to 99.9% uptime, 35% fewer critical incidents, and 20% faster resolution; contributed to design discussions, code reviews, testing, documentation, and production operations.

### Tata Consultancy Services (Client - Equifax Inc)

June 2021 - November 2023

#### Software Engineer I

Bengaluru, India

- Developed and maintained Java/Spring Boot microservices, REST APIs, and data-intensive backend services using AWS, GCP, MySQL, and cloud monitoring tools for enterprise financial and credit-data platforms.
- Increased scalability by 40% and reduced backend latency by 30% through multithreading, API optimization, database query tuning, and service-level performance improvements.
- Automated Jenkins/Docker CI/CD workflows, cutting deployments from hours to under 15 minutes and accelerating releases by 30%; improved service resilience by 25% through production log, API, and database analysis.

### Bharat Heavy Electrical's Limited

May 2019 - August 2019

#### Software Engineering Intern

Bengaluru, India

- Developed Python automation scripts and backend workflow improvements that reduced manual engineering effort by 20% and improved operational efficiency.

## TECHNICAL SKILLS

- Programming:** Java, Python, C++, Kotlin, JavaScript, TypeScript, SQL
- Software Engineering:** Data Structures, Algorithms, Object-Oriented Programming, Design Patterns, REST APIs, Microservices, Distributed Systems, Multithreading, System Design
- Testing & Quality:** JUnit, Unit Testing, Integration Testing, Automated Testing, Debugging, Root-Cause Analysis, Code Reviews
- Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, Jenkins, GitHub Actions, Gradle, CI/CD, CloudWatch
- Databases & Messaging:** MySQL, MongoDB, DynamoDB, SQL, NoSQL, Kafka
- Tools:** Git, Jira, Confluence, Agile, Scrum, Technical Documentation, Unit, Integration and Automated Testing, Code Reviews
- Systems & Operations:** Distributed Systems, Data-Intensive Applications, System Design, Multithreading, High Availability, Low Latency, Fault Tolerance, Reliability, CloudWatch, Monitoring, Observability, Metrics, Root-Cause Analysis

## CERTIFICATIONS & ACHIEVEMENTS

- Generative AI Fundamentals by DataBricks** (2026)
- AWS Certified Developer – Associate** (2025)
- Google Cloud Certified – Associate Cloud Engineer** (2023)
- Brilliant Award (BT Group):** Redesigned microservices to boost customer satisfaction by 90%.
- Top 1% Global Rank:** TCS Codevita Season 9 (out of 150K participants).
